

JOHN BASS

Frontend Software Engineer | React.js | Next.js | TypeScript

Coyle, Oklahoma | 405-385-4231 | babyboy198331@gmail.com | github.com/babyboy198331-coder | linkedin.com/in/john-b-1182183ba

PROFESSIONAL SUMMARY

Frontend Software Engineer specializing in React.js, Next.js, and TypeScript, architecting reusable components and pixel-perfect UI implementations with React Hooks and Context API. Builds responsive, accessible, production-grade applications with REST API integration, state management, and component testing via React Testing Library. Brings a background in operations leadership and cross-functional collaboration to engineering teams.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, React Hooks, Context API, Next.js (SSR), Redux, Tailwind CSS, Vite, React Router, Axios

Testing & Tools: React Testing Library, Git, GitHub, GitHub Actions, CI/CD Pipelines, Vercel, Firebase, Stripe, RESTful APIs

Professional Skills: Reusable Component Architecture, UI/UX Collaboration, Responsive & Mobile-First Design, Performance Optimization, Accessibility (WCAG), Team Leadership, Cross-Functional Communication

PROFESSIONAL EXPERIENCE

Software Development Intern — Skintric

2026

- Collaborated with the design team to deliver a pixel-perfect implementation of an AI-powered skin-analysis web application from a Figma specification, using React, React Hooks, and Vite
- Implemented a live camera-capture pipeline (getUserMedia) with base64 image upload to an AI REST API for real-time analysis
- Built a fully responsive, interactive demographics dashboard with editable, real-time confidence scores across desktop, tablet, and mobile, using Context API for shared UI state
- Worked within a team of 4 engineers in a Git/GitHub workflow, integrating REST APIs and deploying production builds to Vercel through an existing CI/CD pipeline

Shop Manager — Shines Kwik Lube

2018 – 2025

- Directed daily operations, inventory control, and customer service for a high-volume automotive shop completing 10-20 vehicle services daily over 7 years
- Recruited, trained, and supervised a team of 5 staff while managing scheduling and 10-15 vendor and parts accounts, improving service turnaround time and consistency

ADDITIONAL EXPERIENCE

Sandblaster & Monument Installer — Nelson Monument (2025–2026): Performed precision engraving and on-site installation under strict quality and deadline requirements.

Maintenance Technician — OSU Housing (Contract): Executed structural, plumbing, electrical, and cosmetic repairs across residential facilities to meet occupancy deadlines.

PROJECTS

OfferBound — Architected an end-to-end job-application tracker (React, Vite, Firebase Auth, Cloud Firestore) with reusable component design, Google sign-in, a personal stats dashboard, and automated follow-up reminders; wrote component tests with React Testing Library. Live at offerbound.vercel.app

Summarist — Built a server-rendered subscription reading application with Next.js, TypeScript, and Redux, integrating Firebase authentication and Stripe payment processing. Live at summarist-vert.vercel.app

Cinegalaxy — Built a responsive, mobile-first movie-browsing application (Next.js, TypeScript, Tailwind CSS) with a production Vercel deployment pipeline. Live at imdb-clone-one-theta.vercel.app

EDUCATION

Frontend Development Program — Frontend Simplified (2026–Present): React, Next.js, TypeScript, REST APIs, version control, deployment workflows

Diploma — Redmond High School (2001)
